

SENSITIVE SKIN?

We've Got You Covered

SENSITIVITY TO LATEX PROTEINS
remains a primary cause of concern among glove users

LATEX PROTEIN ALLERGIES AFFECT 4.3%
of the general population

ALOE
has a calming effect on the skin and has been shown to **HELP REDUCE ITCHINESS & INFLAMMATION**

TYPE I (IMMEDIATE)
Hypersensitivity to natural rubber latex proteins can be **VERY SERIOUS OR OCCASIONALLY EVEN FATAL**

TYPE IV (DELAYED)
Hypersensitivity which involves a skin rash and is often **CAUSED BY CHEMICALS** used in the manufacturing process

SOME GLOVE USERS can develop rashes linked to irritant contact **DERMATITIS**. This may be caused by chemicals such as **ACCELERATORS** used in the manufacturing of the gloves

As hospitals and other healthcare facilities have increasingly **MOVED FROM LATEX EXAM GLOVES TO NITRILE EXAM GLOVES**, skin irritation and allergies to non-latex gloves has also increased

TRY ACCELERATOR-FREE GLOVES TO MINIMIZE THE RISK

ARE YOU SENSITIVE TO YOUR GLOVES?

Do you have delicate skin or suffer from dry, chapped hands? Do you often wonder if you are sensitive to your gloves? We've got you covered! Sempermed offers four glove brands that provide relief for irritated hands. StarMed® ROSE nitrile exam and Best Touch® latex exam, have an aloe and vitamin E coating, which soothes hands and helps prevent skin irritation. SemperSure® and SemperSure® Green accelerator-free nitrile exam gloves are designed for those with skin sensitivities to regular nitrile gloves., offering all the benefits of a nitrile glove, minus the chemical accelerators that cause allergies.
