Sempermed®
YOUR GLOBAL GLOVE EXPERT™

www.SempermedUSA.com
With nearly 100 years of manufacturing experience, Sempermed has long been a pioneer within the disposable glove industry. From our humble beginnings to ranking among the world’s largest medical and industrial glove manufacturers, we have always remained committed to supplying quality hand protection products.

As a leading disposable glove supplier, we are able to leverage the latest manufacturing technology in quality and innovation. We continuously develop and test products designed to better serve the needs of our customers to ensure Sempermed’s hand protection products achieve optimal safety, reliability and quality.

Our Gloves are Disposable. The People they Protect are Not.

Best Touch® Latex with Aloe & Vitamin E provides superior protection and comfort with the added benefit of aloe and vitamin E. This exclusive formula allows for an enhanced inner coating which helps prevent your skin from becoming damaged or irritated. Additionally, the vitamin E acts as an antioxidant providing extra protection for your hands.

Caution: This product contains natural rubber latex which may cause allergic reactions. Safe use of this product by or on latex sensitized individuals has not been established.

StarMed® Sterile Nitrile offers superb fit, feel, tactile sensitivity, and barrier protection. Designed for critical environments that require a sterile glove, but not necessarily a surgical glove, StarMed® Sterile Nitrile can be especially effective for wound care, trauma, and burn care. Sterile exam gloves are also appropriate for OB/GYN, CCU, and ER departments. All this – with the added benefit of gamma sterilization.

For the latex sensitive, Sempermed® Syntegra CR offers a similar fit and feel to latex. These quality surgical gloves are manufactured with polychloroprene, also known as neoprene, a trusted material with over 70 years of proven performance. Healthcare professionals have come to rely on the non-latex comfort and function of polychloroprene. Excellent tactile sensitivity, while the textured surface and beaded cuff enhance gripping and protection.

Sempermed® Syntegra IR is a latex-free surgical glove made of synthetic polyisoprene (PI). Free from latex proteins, this polyisoprene glove is manufactured with an innovative process that reduces the risk for sensitization. Sempermed® Syntegra IR can be used universally in all surgical applications, and is particularly recommended for emergency care, eye surgery, and pediatrics. The fully anatomical shape with curved fingers corresponds with the natural, relaxed hand position, preventing hand fatigue. The multi-layer coating means that this glove can be donned easily and quickly, even when double gloving.

Surgeons’ hands are the most delicate instruments in the surgical suite. They need to be prepared. And protected. That’s why we developed Sempermed® Supreme surgical gloves. These unique gloves are anatomically designed to reduce hand fatigue and increase comfort. They are powder-free to eliminate aerosolization and skin irritation. A special multi-layer copolymer composition provides optimal protection during surgery.
