

# SENSITIVE SKIN?

We've Got You Covered

**SENSITIVITY TO LATEX PROTEINS**  
remains a primary cause of concern among glove users

**LATEX PROTEIN ALLERGIES AFFECT 4.3%**  
of the general population

**ALOE**  
has a soothing effect on the skin and has been shown to **HELP REDUCE ITCHINESS & INFLAMMATION**

**TYPE I (IMMEDIATE)**  
Hypersensitivity to natural rubber latex proteins can be **VERY SERIOUS OR OCCASIONALLY EVEN FATAL**

**TYPE IV (DELAYED)**  
Hypersensitivity which involves a skin rash and is often **CAUSED BY CHEMICALS** used in the manufacturing process

**SOME GLOVE USERS** can develop rashes linked to irritant contact **DERMATITIS**. This may be caused by chemicals such as **ACCELERATORS** used in the manufacture of the gloves

Many hospitals and healthcare facilities have **MIGRATED AWAY FROM LATEX GLOVES**, yet some users experience skin sensitivities to non-latex gloves

**TRY ACCELERATOR-FREE GLOVES TO MINIMIZE THE RISK**

## ARE YOU SENSITIVE TO YOUR GLOVES?

Do you have delicate skin or suffer from dry, chapped hands? Do you often wonder if you are sensitive to your gloves? We've got you covered! Sempermed offers a handful of glove brands that provide relief for irritated hands. Best Touch® StarMed® ROSE nitrile exam has an aloe coating, which soothe and nourish skin irritation. Our SemperSure® glove family are accelerator-free, low-dermatitis, nitrile exam gloves designed for those with skin sensitivities to standard nitrile gloves. They offer all the benefits of a nitrile glove, minus the chemical accelerators (added in the manufacturing process) that may cause skin reactions.
